Table of Contents

Purpose

The document represents the findings after testing the mobile application "Instagram" which used as a popular social media platform of sharing photos and videos among people who follow each other through this application and contents that matches each profile user interests.

The tests cases examine every feature test by different section on the application: the profile tab takes the user own page where it contains the personal content , the story and reels tabs provides experience of shared content by other followers, the explore tab used for searching other users or any content and the home tab used for watching posts and videos of the followed accounts .

The application suits to content creators, photographers, companies or brands and anyone who want to share content from their life in a social media platform.

Application Overview

The Instagram mobile app is used as a Native application which can be downloaded from the app store where the individual can share and view his own content or other depending on the interests he is interested about and follow.

The contents can be as posts or videos that share ideas, thoughts, promotional content or any captured moment from everyday life when the followers can like it or add a comment to the published content.

Metrics

Test Cases Status

The test cases in the app shows the result of how many cases passed or failed and how many were untested through the tests. As it shown, most of the tests passed and only a few failed.

| Passed	Failed	Untested	Total
188	24	4	216
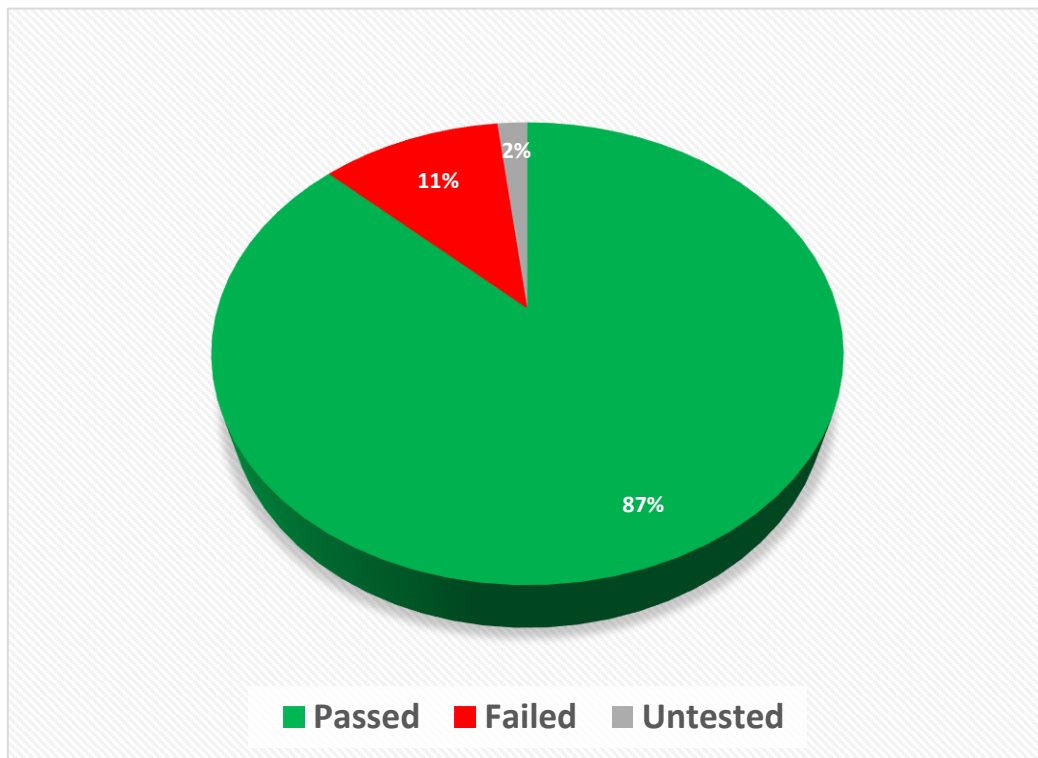

Severity Bugs Status

The column displays the different severities level of the bugs that were tested and found on the Instagram app. As it shown most of the severities are major and minor.

S1-Show Stopper	S2-Critical	S3-Major	S4-Minor	S5-Low	Total
0	0	18	5	1	24

Defect Distribution – Modul Wise

	Functionality	Interrupts	UI/UX	Localization	Campatibility	Total
S1-Show Stopper	0	0	0	0	0	**0**
S2- Critical	0	0	0	0	0	**0**
S3 - Major	9	2	6	0	1	**18**
S4 - Minor	0	1	3	0	0	**4**
S5 - Low	1	0	0	1	0	**2**
Total	**10**	**3**	**9**	**1**	**1**	**24**
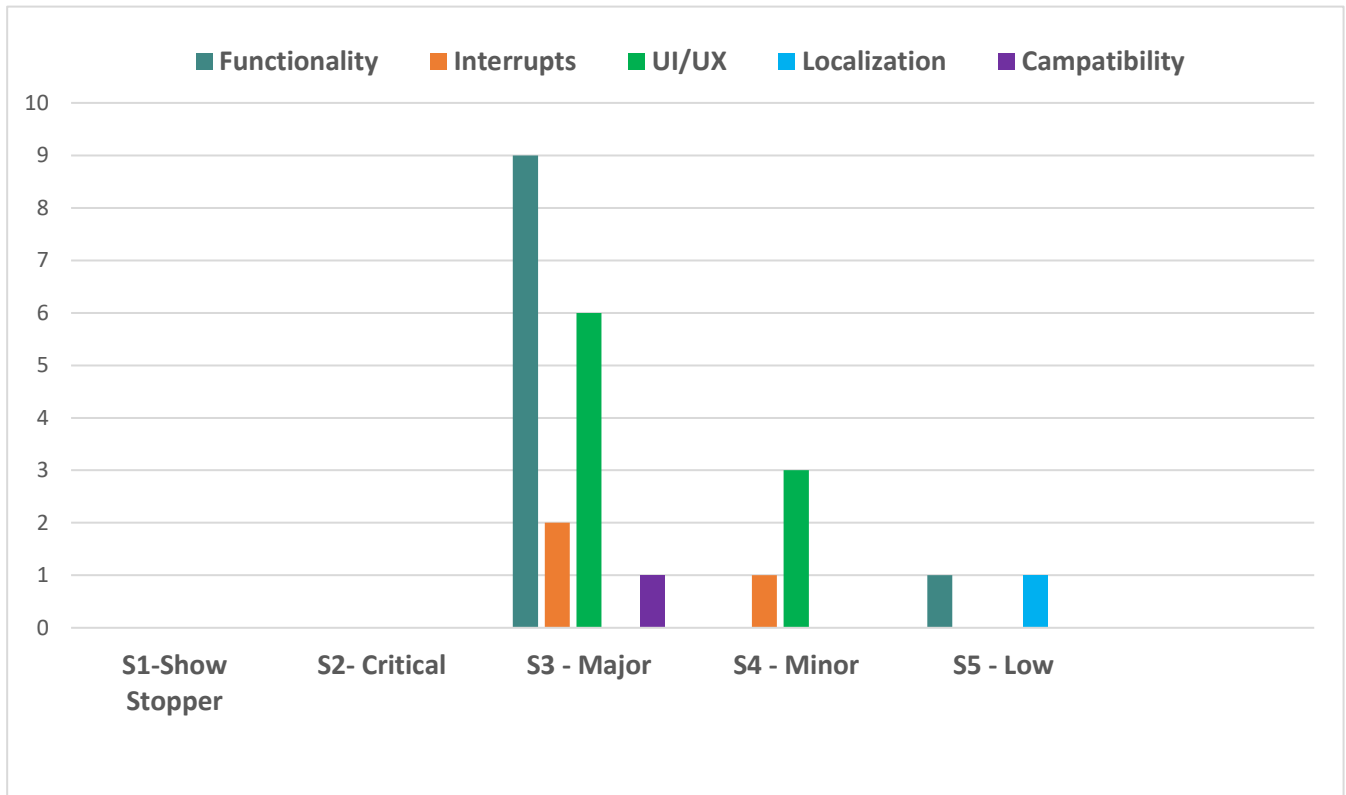

Recommendations

1. The application keeps saving my data even though I marked not to save it before I logged out.
2. I recommend checking the app when it comes to notifications while the internet is disconnected, and the videos are still displayed
3. Tapping the "Like" button and tap back to "Dislike" won´t take the number down on a Reel video
4. Uncomfortable way to pause a Reel video by pressing and not letting go the finger, therefore it´s better to change the settings for this mode in the app
5. I recommend fixing the "Live" mode if a user would like to display a live video since it was not functioning
6. The app doesn´t rotate when I chose the option automatic rotation on my mobile device, I would recommend fixing it since it will add more enjoyable and user-friendly experience for the user in some of the contents
7. When it comes to accessibility using, I recommend having much more options than only Captions and translation or the Dark mode option, such as voice control for example when the text can be heard or adjusting font size of the text for people with disabilities in order to make the use much easier for them.

Conclusion

After reviewing the tests that were done and the bugs that were found on "Instagram" mobile application, I can say that most of the bugs are in between Major to Minor severity level and most of the bugs are functional and UI/UX which affect the app when it comes to usability and performance.
While there were not any bugs that were found as on Critical level or Show Stopper, I can only see a place for improvements when it comes to the user experience.
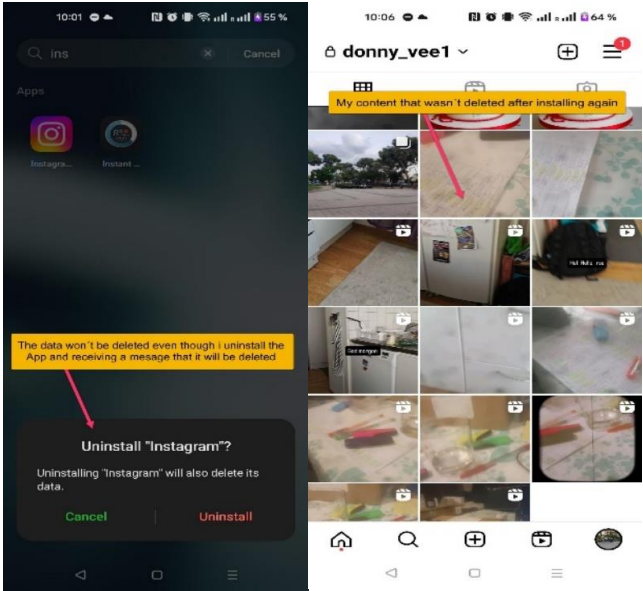

As a result, I recommend releasing the app.

Bugs List

[IMA-1] Uninstall the app gives me a message that my data will be deleted but it´s still saved when you install the app again

[IMA-2] Turning off my Internet connection and the App is still able to show my current location when I'm creating a "Story"

[IMA-3] After logging out and choosing not to save my info, the App still remembers my username when i log back in

[IMA-4] Choosing English language won´t change all tabs to English in the app

[IMA-5] Pressing the menu for two different Instagram users will show different results

[IMA-6] Switching side of camera icon in the toolbar doesn´t react as should

[IMA-7] Invalid search term does not display "no results" message on Instagram

[IMA-8] Receiving limit error message after 15 followers instead of 200 on Instagram

[IMA-9] Not a disconnection message displayed after searching with the internet turned off

[IMA-10] Photo navigation requires multiple swipes to move smoothly

[IMA-11] Video posts continue playing without notification after disconnected internet

[IMA-12] Pressing on the tab "Watch more reels" will play the same reel again

[IMA-13] Tapping on the Reel video will only mute it instead of pausing it

[IMA-14] Tapping twice on Reel video that i liked won´t dislike my like

[IMA-15] The speed control functionality in the Reels videos is behaving in reverse

[IMA-16] Changing the network connection affects the ability to browse videos on Reels

[IMA-17] Filming on "Live" mode is not working

[IMA-18] The timer option isn't displayed in the "Post" and "Story" mode

[IMA-19] Having "Boomerang" video in "Reels" takes many steps

[IMA-20] Differences in the option "View once" while viewing a photo on a mobile and Web

[IMA-21] The app doesn´t count the numbers of "Followers" as it should

[IMA-22] Top menu missing after pressing "Profile" tab requires navigation through "Home" tab to access it

[IMA-23] Instagram limits the bio to 150 characters, but it limits me to write 124 characters

[IMA-24] The app doesn´t rotate when I press on "Auto rotate" mode

Bug Reports

Uninstall the app gives me a message that my data will be deleted but it´s still saved when you install the app again **Created: 08/Sep/24 Updated: 09/Sep/24**

Status:	To Do		
Project:	Instagram Mobile App		
Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce:
1. After launching the "Instagram" app press on its icon on your home screen or in the app drawer
2. Press and hold the icon and tap on "Uninstall" and then "Ok"
3. Enter the Google app store and download the "Instagram" app again
4. Launched the app and write your username that you registered before with the same password
5. Enter to your profile and check the posts, Stories, Reels and tags

Actual Result:
After uninstalling the app and receiving a message that my data would be deleted,
Instagram shows all my posts, stories, reels, and tags after reinstalling

Expected Result:
I will expect that after uninstalling the "Instagram" app from my device and re-installing it back again, the app won´t remember my account and i won´t be able to see my previous data

[IMA-2] Turning off my Internet connection and the App is still able to show my current location when I'm creating a "Story" **Created: 08/Sep/24 Updated: 08/Sep/24**

Description

Steps to Reproduce :
1. Enter the "Instagram" app
2. Press the "+" icon in the bottom middle
3. Choose the "Story" mode and take a video or a photo
4. Press the "Sticker" icon at the top and turn off the internet connection
5. Press on "Location" tab
6. View the current places that the app is showing you

Actual Result :
The app shows me my current location even though that i turned off the internet connection before

Expected Result :
I will expect after turning off the location the app won't show me my current location

[IMA-3] After logging out and choosing not to save my info, the App still remembers my username when i log in back again **Created: 08/Sep/24 Updated: 11/Sep/24**

Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce :
1. Enter the Instagram app
2. Press on your profile photo
3. Enter your correct password
4. After login to the app, log out from your account
5. Tap on your profile picture in the bottom right
6. Tap your username again and then tap on the three lines in the top right corner
7. Go to "Settings and privacy"
8. Scroll down and tap "Log Out"
9. On the new message to save your login info, choose "Not now"
10. Press the Log out tab
11. Enter the app again

Actual Result :
The Instagram app saved my details even though i chose not to save it before i logout.

Expected Result :
I will expect that after logout and choosing not to save my info for the next time i´m entering, the app won´t save my details.

[IMA-4] Choosing English language won´t change all tabs to English in the app
Created: 08/Sep/24 Updated: 08/Sep/24

| Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S4 - Minor

Description

Steps to Reproduce :
1. Enter to the "Instagram" app
2. Enter the menu and press "Settings and privacy"
3. Scroll down to the tab "Language" and choose English
4. Go back to menu and chose the tab "Your activity"

Actual Result :
After selecting English as a language, i will enter to "Your activity" tab and it
will be displayed in Hebrew

Expected Result :
I will expect after selecting English language, everything will be displayed in English.

[IMA-5] Pressing the menu for two different Instagram users will show different results.
Created: 08/Sep/24 Updated: 08/Sep/24

| Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Steps to Reproduce :
1. Enter Instagram app with first user (donny_vee1)
2. Press on the "Home" tab at the bottom left and then the "Profile" tab on the bottom right
3. Press on the menu at the top right corner
4. Choose the tab "Settings and Privacy"
5. Enter the "Instagram" app with the second user (mr_no_one81)
6. Pressing on your profile photo at the bottom right
7. Press on the "Home" tab at the bottom left and then the "Profile" tab on the bottom right
8. Press the menu at the top right

Active Result :
When pressing the menu at one profile "donny_vee1" it will lead me to a window with different tabs options while in the second profile "mr_no_one1" when i press the menu it will lead me directly to the "Setting and activity"

Expected Result :
I will expect to get the same result with the two different profiles

[IMA-6] Switching side of camera icon in the toolbar doesn´t react as should
Created: 09/Sep/24 Updated: 09/Sep/24

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S5 - Low

Description

Steps to Reproduce :
1. Enter Instagram app
2. Press the "+" tab in the middle bottom of the page
3. Choose the "Story" option in the bottom of the page
4. Swipe up the page and see the camera icon on the last side
5. Press on the top right side on the settings icon
6. Under "Camera tools" switch the camera to the right side
7. Go back to the home page and enter again to the "Story"
8. Swipe up and check which side is the "Camera" icon

Actual Result :
The "Camera" icon is not being switched to the right side of the toolbar as i chose in the "Story" settings

Expected Result :
I will expect that the camera will display at the side that I chose

| Status:	To Do
Project:	Instagram Mobile App

Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce :
1. 1.Enter the Instagram app
2. Tap on the "Search" icon (magnifying glass) at the bottom page
3. In the new search page enter a term that randomly won´t show any result like: "non exist content"

Actual Result :
I don´t receive any error message from the app after typing a non-existed content in the search

Expected Result :
I will expect to receive a message that says "No result" or will tell me that the result doesn´t match to my search

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Steps to Reproduce :
1. Enter the "Instagram" app
2. Press on the "Search" icon at the bottom page(magnifying glasses)
3. Type a name of a user in the "Search" tab ("Carina Söderlund")
4. Press on one of the profile users
5. Press on the "Follow" tab

Actual Result :
When pressing the "Follow" tab, i get a message that tells me "Try Again Later" and Instagram limited my following people while i followed only 15 people and Instagram limit 200 following for a day. The limit was for a minute and then i could continue.

Expected Result :
I expect i will be able to press on the "Follow" tab of the profile i typed and then press twice on the "Follow" tab to unfollow the profile

[IMA-9] No disconnection message displayed after searching with the internet turned off
Created: 09/Sep/24 Updated: 12/Sep/24

Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce :
1. Enter the "Instagram" app
2. Press on the magnifying glass icon at the bottom of the page
3. Turn off the wifi connection on the mobile device
4. Type a name "Don Dokken" to search in the "Search" text box
5. Press on the "Search" tab on your device
6. Turn on the wifi back and continue the search

Actual Result :
After turning off the wifi connection, i didn´t receive any error message about internet connection
Expected Result :
I will expect to receive an error message for internet disconnection or a notification to try later

[IMA-10] Photo navigation requires multiple swipes to move smoothly
Created: 09/Sep/24 Updated: 09/Sep/24

Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S4 - Minor

Description

Steps to Reproduce :
1. 1.Enter the "Instagram" app
2. Scroll to one of the posts which is a photo and has several photos in the post (Under each photo there is a dot)
3. Swipe to the left to move the photos to the next one until you reach to the end
4. Swipe to the right to move back to the first photo

Actual Result :
It takes a few times to swipes especially when you swipe fast in between the post photos

Expected Result :
I would expect that the navigating behaving will be smoothly in between the photos and i won´t need to press a few times on same photo to pass it

Created: 09/Sep/24 Updated: 09/Sep/24

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S4 - Minor

Description

Steps to Reproduce :
1. Enter "Instagram" app
2. Scroll down the feed
3. Disconnect your internet connection
4. Continue to scroll down the feed
5. Connect the internet connection back again
6. Scroll up and down the feed

Actual Result :
I don´t get an error message regarding internet disconnection, only a message that the page can´t be refreshed but i can still watch content, save a post, view a video and swipe in between photos of the posts on my feed

Expected Result :
I will expect to get an error message once i disconnect the internet and continue to scroll my feed

[IMA-12] Pressing on the tab "Watch more reels" will play the same reel again
Created: 09/Sep/24 Updated: 09/Sep/24

Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major
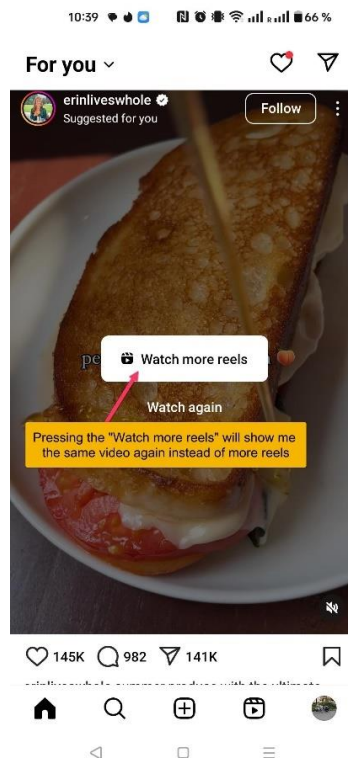

Description

Steps to Reproduce :
1. 1.Enter the "Instagram" app
2. Scroll down your feed and stay on a Reel video
3. Watch the Reel video once it automatically plays until it finished
4. Press on the button "Watch more Reels" once it finished

Actual Result :
After pressing "Watch more Reels" i get the same Reel video that i watched now only in a full screen which is same reactions as i pressed on "Watch again" button

Expected Result :
I will expect to watch more Reels videos from the same profile or same style of Reels videos as i watched now

[IMA-13] Tapping on the Reel video will only mute it instead of pause it
Created: 10/Sep/24 Updated: 10/Sep/24

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steprs to Reproduce :
1. Enter the "Instagram" app
2. Press on the "Reels" (film) icon at the bottom of the home page
3. Enter the "Reels" section and tap everywhere to pause a video on the screen
4. The Reel video supposed to stop once you tap one time

Actual Result :
Tapping on the screen once doesn´t pause the video, only when you hold the Reel video and not releasing which is not the most convenient

Expected Result :
I will expect that once you tap and let go on the Reel video everywhere on the screen, it will be paused.

Tapping twice on Reel video that i liked won´t dislike my like
Created: 10/Sep/24 Updated: 10/Sep/24

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce :
1. 1.Enter the "Instagram" app
2. Press on the "Reels" (film) icon at the bottom of the home page
3. Press on the "Heart" icon on the right side in the middle
4. Press again on the "Heart" tab and see how it goes from red to transparent colour
5. Enter the "Reels" section and tap twice on the video and see the "Heart" icon will be display on the screen
6. Tap twice again on the video and the like should turn to dislike

Actual Result :
Tapping twice on the Reel video and i can see an icon of heart on the screen which means that the video was liked but when i tap twice again it continue to be liked
and doesn´t remove the like that i did

Expected Result :
I will expect that when i tap twice on the Reel video, the video will be liked and once i tap twice again on the video, it will dislike and cancel my like.
I will expect to press on the "Heart" icon, and it will like the video and when i press back it will dislike the video.

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Steps to Reproduce :
1. Enter the "Instagram" app
2. Press on the "Reels" icon at the bottom home page
3. Tap the "Camera" icon at the top right side
4. Press on the "Speed" icon on the left side
5. Choose one of the speeds from 1 to 5 when 1 is normal speed and 5 is i times faster speed
6. Tap and don´t let go on the circle icon in the middle and start to film a "Reel" video
7. Release the finger once you want to stop recording the "Reel" video

Actual Result :
The speed limits are synchronized in reverse. When I choose 1x speed, the video plays in the fastest motion, and when I select 5x speed, it plays in the slowest motion.

Expected Result :
I expect that when I press the 1x speed option, the video will play at normal speed.
As the speed increases to 2x, 3x, and 5x, the video should play progressively faster

[IMA-16] Changing the network connection affects the ability to browse videos on Reels Created: 10/Sep/24 Updated: 10/Sep/24	
Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Steps to Reproduce :
1. Enter to your Settings on your mobile device
2. Chose Mobile network
3. Put your Prefered network type on 5G
4. Enter to "Instagram" app
5. Tap the "Reels" icon at the bottom
6. In the "Reels" feed play on of the "Reels" videos
7. Go back to your mobile Settings
8. Chose Mobile network
9. Put your Preferred network type on 2G
10. Enter the "Instagram" again
11. Play the last "Reels"video you watch
    (It will be shown on your screen)
12. Turn on your wi-fi connection and turn off your mobile internet connection
13. Play the same "Reels" videos you played before

Actual Result :
The "Reels" video stuck in the middle when i play it on 2G while on 5G it plays it smoothly in repeat

Expected Result :
I will expect the app will play the "Reels" video in a smooth way between 5G to 2G connection.

Filming on "Live" mode is not working **Created: 10/Sep/24 Updated: 17/Sep/24**

Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	High
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major
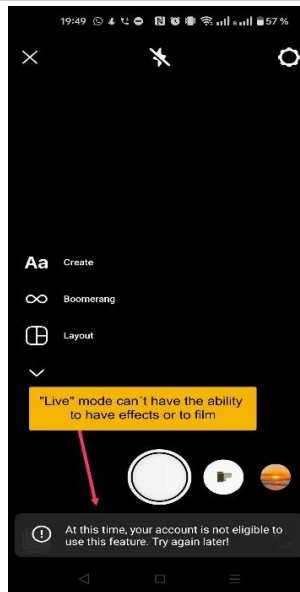

Description

Steps to Reproduce :
1. Entering the "Instagram" app
2. Swipe to the right side for camera mode
3. Choosing one of the options between "Post", "Story" , "Reel" and "Live"
4. Choose "Post" and then press on the "Camera" icon on the right side
5. Take a photo and only after the "Effects" will be displayed when pressing on "Edit" button on the bottom left side
6. Press on it and you will be able to use it for one type of effect
7. For "Story", take a video first and then type on the "Effects" icon on the top right side
8. Switch in between the effects options
9. For "Reels", Press the top left side and chose from the options, then you can take a video
10. For "Live" option the "Effects" aren´t being shown

Actual Result :
Switching to 'Live' mode doesn't display the effects and I'm unable to film; instead,
I receive an error message

Expected Result :
I will expect to choose effects for every option ("Post", "Story" "Reels", "Live")
when I switch to camera

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Steps to Reproduce :
1. Enter the "Instagram" app
2. Swipe to the right to access the camera
3. In "Reels" press on the "Timer" icon on the left side of the screen and tap on it.
4. Tap on the timer icon and choose duration time from 3 seconds to 15 seconds, once you finished press on "Set timer" button
5. Tap the circle button to start the timer countdown
6. After the countdown is finish, the photo will be taken automatically.

Actual Result :
Timer option isn´t displayed on the "Post" mode and not on the "Story", only in the "Reel" mode

Expected Result :
I will expect to have time option in the Post, Story and Reel mode and adjust it by the time I chose

[IMA-19] Having "Boomerang" video in "Reels" takes many steps	
Created: 10/Sep/24 Updated: 10/Sep/24	
Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	**Priority:**	Medium
Reporter:	Tomer Darmon	**Assignee:**	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S4 - Minor

"Boomerang" option is not available in Reel mode
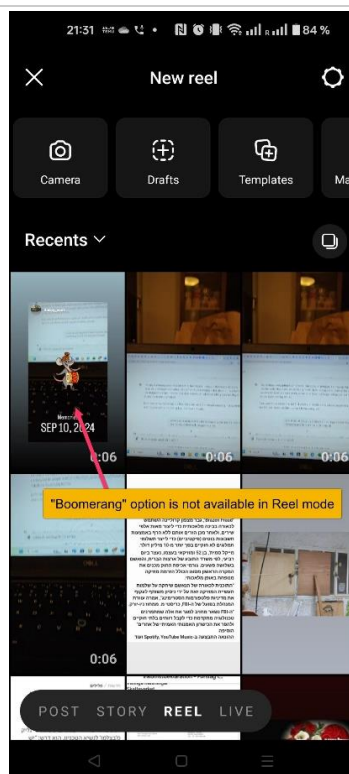

Description

Steps to Reproduce :
1. Enter the "Instagram" app
2. Press on the "Story" mode and choose on the top left side the "Boomerang" icon
3. Tap and hold the circle button until you finish to record
4. Press the "Next" at the bottom right and then press "Share" at the bottom page
5. Press on the "+" option to be at Reel mode and choose from the gallery and "Share"

Actual Result :
"Boomerang" option is not available on "Reels", in order to have a "Boomerang" it requires many steps to use Boomerang in "Reels"

Expected Result :
I will expect the" Boomerang" option will be available also on the "Reel" beside the "Story" mode

Differences in the option "View once" while viewing a photo on a mobile and Web
Created: 10/Sep/24 Updated: 10/Sep/24

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14 Browser : Chrome Version 127.0.6533.120 OS : Windows 11 Pro, 22631.3880		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce :
1. Enter the "Instagram" app
2. Enter to the messages and choose a recipient you would like to send a photo
3. Press on the "Camera" icon at the bottom left
4. Select a photo from your gallery or take a new photo
5. Tap once on the photo and choose at the bottom left on the option "View once"
6. Press "Send"

Actual Result:
The recipient received the photo i sent and successfully open it in a Web but even though it´s written under the photo "No longer available", he can still see it on his conversation but when the App is opened on a mobile device it´s not available to view

Expected Result :
I will expect that receiver will be able to view the photo only once and then he won´t be able again

Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce :
1. Enter the "Instagram" app
2. Tap on your "Profile" tab at the bottom right
3. Press at the middle top on the "Followers"
4. View your "Followers" account

Actual Result :
The app doesn´t count correctly the number of followers and shows the followers profile twice

Expected Result :
I will expect the number will be displayed at the "Followers" and match to the actual accounts that follow my profile and the profile who follows me won´t be displayed more than once

Top menu missing after pressing "Profile" tab requires navigation through "Home" tab to access it **Created: 10/Sep/24 Updated: 10/Sep/24**

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S4 - Minor

Description

Steps to Reproduce :
1. Enter the "Instagram" app
2. Tap on the profile picture or the profile icon in the bottom right corner of the screen
3. Tap again on the "Home" tab on the left side of the screen and then your profile icon on the right once again
4. At the top right-side tap on the three lines and the menu will be opened

Actual Result :
After pressing the "Profile" tab in the bottom right corner, the menu at the top doesn't appear. Instead, the app takes me to my profile page, requiring me to press the "Home" tab and then the "Profile" tab again to see the top menu.

Expected Result :
I would expect that after entering the "Instagram" app, i will tap on the profile tab on the bottom right side and i will see the menu at the top right side immediately

Status:	To Do
Project:	Instagram Mobile App

| Type:	Bug	Priority:	Medium
Reporter:	Tomer Darmon	Assignee:	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Description

Steps to Reproduce :
1. Enter the "Instagram" app
2. Press on your "Profile" icon at the bottom right
3. Tap on the tab "Edit profile" at the top left
4. Chose the "Bio" section and write a bio
5. Press on the "Checkmark" at the top right once you finished

Actual Result :
"Instagram" limits my "bio´s" writing after only 124 characters without a notification
while the limit is until 150 characters

Expected Result :
I will expect that "Instagram" won´t limit me under 150 characters according to its last update

[IMA-24] The app doesn´t rotate when i press on "Auto rotate" mode
**Created: 11/Sep/24 Updated: 11/Sep/24**

Status:	To Do
Project:	Instagram Mobile App

Type:	Bug	**Priority:**	Medium
Reporter:	Tomer Darmon	**Assignee:**	Unassigned
Environment:	OS : Android Device : One Plus 11 5G OS Version : Android 14		

Attachments:	
Severity1:	S3 - Major

Steps to Reproduce :
1. Swipe down from the top on the screen to access the quick settings
2. Press on the option "Auto Rotate" and swipe up the page
3. Ener the "Instagram" app
4. Rotate your phone on any page from portrait mode to landscape mode

Actual Result :
The app doesn´t rotate after choosing the rotate mode and the screen still stay on portrait mode and not landscape mode when i rotate it.

Expected Result :
I expect the screen to change its view according to the mode I rotated my phone
